Dear <Salutation>

Thanks to those who attended our first auction of ewes and lambs. All sheep were sold. Mother-of-All-Things thinks that "the lucky buyers stole those sheep", but we are overstocked in a drought, so out they went.

There will be one more sale of Meatmaster Ewes each with a wether lamb at Gatton this coming Monday 28th July. This will be our last auction of sheep until Spring at least, and it may be the last Gatton Auction as the auctioneer, Bill Hallas, is probably retiring.

We will send a full ute load of sheep for this last sale.

Here is a couple we sold at the last auction and those on offer this sale are similar, probably better quality as we dig deeper into our flock to fill the ute.

All ewes are 50% White Dorper/50% Damara. The wether lambs are 75% Damara/25% White Dorper and about 4 weeks old. All ewes have had an embryo lamb and a natural lamb, so are proven breeders in the prime of life. They are good temperament, good shedders – never been shorn. We seldom offer ewes as good as this at auction.

The Auction will be held at Gatton Saleyards Monday 28th July 2014, 11am sharp.

Sheep are sold first, on the dot of 11am, so do not be late or you will miss the early bargains.

For more information about these auctions see:
http://www.damaras.com/newsletters/sh-120110-our-periodic-sheep-auctions.pdf

Please feel free to ask about rams and other top class ewes which we reserve for on-farm sales and do not sell at the Gatton auction. We have very good stud Damara and Meatmaster rams now, and commercial Dorper rams and will find some good ewes to go to people who buy rams. We also have a few of our best pure Dorper ewes left. (Or buy some cheap ewes at the auction and a good ram from us.)

See pictures of Rams at:
http://www.damaras.com/album/rams.html

Finally, for those going to the Brisbane Exhibition, Mother-of-All-Things will be there again with her favourite sheep on display. They will be in a pen right beside the Animal Nursery near the Shearing Demonstrations Stage. Go and say "hello".
